

Voodoo Challenge Match – 200 Yard Texas Mosquito Shoot

Match Description and Course of Fire/Scoring Instructions

Texas Mosquito Shoot (200 Yards)

Course of Fire: Will consist of shooting two Texas Mosquito Shoot targets for a total of 2 record bulls with 5 shots in each. An unlimited number of sighters may be used in preparation or during shooting the record bulls. Be sure to label targets 1 of 2, 2 of 2.

Scoring: Best-edge scoring is used for ring score on this match. Match score includes two measures, the ring score and group size score. Add the ring score and group size score together for a grand total on each target. Ring Score - 5 shots on each target, 10 shots total, maximum score is 50 points per target, 100 points total for match. Group Size Score - Group score is determined as follows: 5 shots on each target, 10 shots total, maximum score is 50 points per target, 100 points total for match. Combined, the maximum score is 200 for the match, plus X's.

Each target will have a group of 5 shots. Measure the widest group size for the 5 shots on a target with a ruler. Measurements should be rounded off to the higher inch (e.g. 2.25 inch group size is scored as "3 inch or less"). See the table below for points assigned based on widest group size on each target.

1 inch or less = 50 pts.
2 inches or less = 45 pts.
3 inches or less = 40 pts.
4 inches or less = 35 pts.
5 inches or less = 30 pts.
6 inches or less = 25 pts.
7 inches or less = 20 pts.
8 inches or less = 15 pts.
9 inches or less = 10 pts.
10 inches or less = 5 pts.

Note A: When measuring the group size with a ruler, please draw a line on the target between the two holes used to measure the widest group size with a pen as follows:

-----O-----O-----, and write in the distance you measured next to this line that connects the two holes. Measurements should be rounded off to the higher inch (e.g. 2.25 inch group size is scored as "3 inches or less").

Note B: For Group Size scoring, if any of the 5 shots are outside the rings, but still on the paper target, all shots must be included in group size determination. If any of the 5 shots are off the paper target, then the group size score will be zero.
