ABOUT US

At KGM Technologies, Our Mission is Innovation. Many of the systems and technologies used by our front-line Military and Law Enforcement have provided decades of service without significant innovation. Our mission at KGM Technologies is to change that reality.

KGM Technologies is a 07/02 FFL service-disabled veteran owned leading-edge technology and manufacturing company. KGM specializes in Research and Development, Small Arms Suppressor Technology, Advanced Weapons Systems, Material Science Surface, and Coatings Technologies, as well as having a state-of-the art OEM manufacturing facility.

Our research and development team is led by our Founder/CTO Kyle Grob. Our CEO, Richard Cope is a retired US Marine Corps Officer who has overseen billions of dollars of government contracts throughout his career.

CORE COMPETENCIES

- Small Arms Suppressor Technology
- Research and Development
- Advanced Weapons Systems
- Material Science Surface and Coatings Technologies
- OEM Manufacturing facility

PAST & CURRENT CLIENTS

Projects with US Military, Law Enforcement & Foreign Military

SUPPRESSOR TECHNOLOGY DIFFERENTIATORS

ACCURACY - KGM Suppressors are designed to maintain your current weapon system's accuracy with minimal POI (Point of Impact) Shift.

REDUCED FLASH - KGM Suppressors utilize a technology mixture of our patented baffle stack and KGM proprietary material coating of all internal parts to allow for the lowest possible flash signature making yourself invisible from the enemy.

RECOIL REDUCTION - KGM Suppressors feature our APEC (Adjustable Port End Cap). This allows for maximum recoil reduction regardless of system's caliber or configuration.

SOUND REDUCTION - KGM Suppressors meet OSHA safe Net Sound Reduction (NSR) for impulse noise levels allowing end-users to perform at the highest level, while protecting from hearing loss.

COMPANY DIFFERENTIATORS

- Research and Development is what drives innovation at KGM. Bringing 75+ years of high-level R&D experience to the table makes us extremely capable to dive into the deepest-rooted projects. Our tenured staff of veterans, engineers, professional marksmen, developers, and industry professionals can assist any organization with a custom initiative.
- KGM Technologies has a state of the art 37,000sqft manufacturing facility. KGM has the infrastructure and equipment in place to not only develop and test all caliber of weapons, but also has the framework and equipment in place for commercialization for any size requirement.
- KGM has demonstrated that its superior suppressor technology enhances our military and law enforcement operators' health by significantly reducing the felt sound pressure and brain concussion impact.
- KGM's Weapon Systems division is devoted to changing the mindset on what is possible today. It is our belief that the cross pollination of technology and science from different market sectors gives our customers the chance to see a truly application specific outcome.
- KGM has developed and is testing a proprietary anti-corrosion material coatings technology that will prolong the life and function of weapons systems used by our military.
