65GR VMAX	ADI 2213SC	60	3899 MAX	70GR V-GEDDON	ADI 2213SC	60	

NOTES:

65GR VMAX: SHOT EXTREMELY ACCURATELY. LOW RECOIL. SUPER FAST. MAXED OUT OVER 4300. PERSONAL SAFE MAX 59.9 GR OF ADI 2209, BUT 60GR WOULD BE FINE IF YOUR A LITTLE NUTS AND ARE A VELOCITY WHORE LIKE ME.

70GR NOS V-GEDDON: SHOT ACCURATELY. NOT -AS- ACCURATE AS VMAX. 2209 AGAIN PERFORMED BEST WITH SOME REALLY GOOD VELOCITY PUNCHING GOOD GROUPS. I NOTED THE V-GEDDON DOESN'T EXPAND OR CAUSE THE VIOLENT DEVESTATION I'M LOOKING FOR ON GAME THOUGH, HOPING THE VMAX DOES BETTER, WILL FIND OUT SOON.

POWDER NOTES: I had high hopes for 2213SC which really failed to shine. What I think was happening, was some of the powder was being blown out before being used due to its velocity. Though 2209 exceeded my expectations I still wonder if a slightly longer barrel may have helped, but 27" is a significant barrel already. All in all, 2209 is accurate and lightning fast. Couldn't ask for more.
