

Three years ago Imperial introduced the .311 Imperial Magnum, a new magnum cartridge that represented the most significant advancement in magnum cartridge design for 50 years.

“The Best All-Purpose Hunting Cartridge Ever Designed.”

— Elder Jeske, *BC Outdoors Magazine*

“Magnum Cases Without A Belt – The Way Magnums Should Have Been Designed In The First Place”

— Holt Bodinson, *Guns Magazine*

Limited numbers of Imperial Magnum Rifles, chambered for the .311, were released to the public and the positive response was overwhelming. This encouraged us to develop a family of Imperial Magnums based on the .311 design. The results are – 4 additional proprietary cartridges that outperform all other calibres in their class. The Imperial Magnums offer distinct advantages to the serious hunter and reloader.

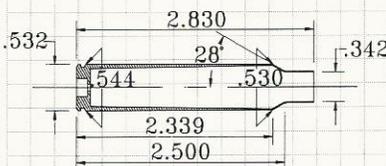

Our beltless cartridge case design allows much improved powder capacity, more accurate headspacing, smoother feeding and simplified reloading. Plus, the Imperial Magnums are designed to chamber in standard magnum actions. Only unprimed cartridge cases are available for 1993 and therefore are intended only for the experienced handloader. Customers are supplied loading data with each purchase. RCBS dies are also available.

IMPERIAL MAGNUM CARTRIDGES

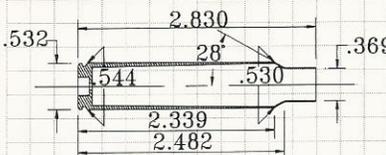

7mm Imperial Magnum

7mm fans love this one. An outstanding cartridge for all non-dangerous game and excellent for long range competitions. It has a larger case capacity than even the 7mm STW Wildcat.

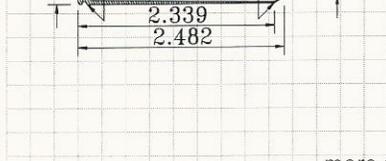

.311 Imperial Magnum

This is the cartridge that started the modern phase of magnum cartridge development. The combination of it's unique bullet diameter and high velocity make it extremely accurate and hard hitting. POSSIBLY THE BEST ALL AROUND HUNTING CARTRIDGE EVER DESIGNED.

.338 Imperial Magnum

More powerful than either the Weatherby or Winchester .338's. This cartridge is a superb choice for heavy game.

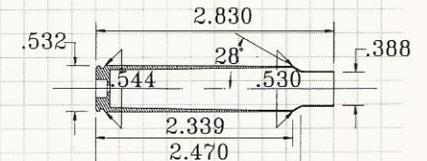

.360 Imperial Magnum

Finally a .358 calibre cartridge that really delivers! It's high velocity provides a very flat trajectory and delivers more energy at 300 yards than the .340 Weatherby can muster at 100!

.300 Imperial Magnum

With a larger case capacity than the Weatherby or Winchester .300 magnums, it is the most powerful .300 magnum available.
