LEARNING OBJECTIVES

- Equipment use and explanation
- Ballistics and building accurate range cards based on your rifle and ammunition
- Setting up the rifle, scope and fitting to the shooter
- We will chronograph your ammunition and use ballistic programs to make data cards
- Check weapons for any potential problems
- Various shooting drills
- Sling, Bipod and soft support shooting
- Basics of wind reading
- Basics of environmental effects for long range
- Establish true scope adjustments versus advertised
- Cleaning and care of rifle

LONG RANGE RIFLE EQUIPMENT

- Rifle (Either Bolt or Auto Loader)
- Applied Ballistics App
- Caliber .223/ 5.56 – .30 /7.62 Rifle must be capable of producing one 3 shot group of MOA or less in size, if you have a caliber that doesn't fall within these parameters please call.
- 200 rounds of Match grade ammo. (Max 2900 FPS velocity limit is to prevent damage to targets at close range)
- Scope cable of 1/2 MOA or Mil adjustments (mounted to rifle prior to beginning of instruction class)
- Sling
- Bipod
- Rear shooting bag or sock
- Shooting mat or Blanket for comfort, keep it portable.
- Rifle case or drag bag
- Cleaning equipment, rod, lube tools for rifle or optics
- Seasonal appropriate Clothing long sleeve shirt, pants, shoes/boots (no sandals)
- Hat for sun and rain, we will be shooting in either
- Sunblock
- Lunch, Snack and WATER (We will not be leaving range area for breaks or lunch)
- Hearing protection (Muffs preferred)
- Eye protection

Additional nice to have:

- Pen, paper (shooters log), calculator, kestrel, ballistic app, spotting scope, scope level (helps to avoid canting of rifle), gloves, ice cooler.

IMPORTANT PRIOR MAIN CLASS:

SUNDAY 01/05/2025 2:00PM

Is a **class, held at Shoot center**, to cover basic ballistics, chronograph velocities with students' individual guns, and ensure a rough zero.

Students MUST have the rifle, optic, and match grade ammo they intend to use for class, by OCT 20
